Child Development Screenings

Ages and Stages is a set of questionnaires about children's development. It has been used for more than 20 years to make sure children are developing well. A screening provides a quick look at how children are doing in important areas such as communication, physical ability, social skills, and problem-solving skills. Ages and Stages can help identify your child's strengths as well as any areas where your child may need support. I love this screening tool because it involves the parents/guardians, child and the care provider. The parent/guardian fills out the questionnaire while playing with their child and returns it to the care provider or CCDF Coordinator for results. Based on the results, the child's individualized lesson plan can be created and if an area of concern is identified then a referral can be made to an appropriate support agency.

Many Child Care Centers are already providing a child development screening. And it may be Ages and Stages, but for parents who are interested, I can provide copies of the following months in the ASQ-3: 2, 4, 6, 8, 9, 10, 12, 14, 16, 18, 20, 24, 27, 30, 33, 36, 42, 48. Keep in mind: your children all grow and development in differing rates. And it is okay 😊

I also have the Social Emotional questionnaires in the months: 2, 6, 12, 18, 24, 30, 36, 48, 60.

They are easy to score and if you see any area of concern, please contact me or your child's teacher or child care provider so we can give you some ideas of how to increase your child's opportunities to grow in those areas.

Any questions, please contact Trish Sterling at 906-632-5250 or psterling@saulttribe.net

Safe Infant Sleep Checklist

Place **babies on their backs** for naps and at night until they are 1 year old. Make sure babies sleep on a firm, flat surface in their own crib, bassinet or play yard.

Choose a **firm mattress** and fitted sheet for baby's crib. **Remove toys, blankets, pillows, bumper pads** and other accessories from the crib.

Dress baby in a **wearable blanket, onesie** or similar clothing for every sleep. A loose blanket could cover baby's airway or make their body temperature too high.

Share your room, not your bed. Place baby's crib or bassinet in your bedroom instead of letting baby sleep in the same bed with you.

Follow the manufacturer's instructions to assemble your crib. Make sure to complete and **submit the product registration card** to learn about any recalls or safety updates.
